Capacity: 12 passengers.

Built at Echuca, P.S. Adelaide is the oldest wooden hulled paddlesteamer still operating in the World! Used as a logging boat for 90 odd years, she left the town briefly during the 1950's but later was brought back to Echuca as a community effort in 1960. 1964 saw her lifted from the water and put to rest in Echuca's Hopwood Gardens, where she lay for 20 years. However, in 1980 restoration commenced and she was refloated in 1984. Contact Address 52 Murray Esplanade, Echuca, Victoria 3564 Telephone Mobile Fax
